Design for Journalists

- **What is design?**
 - Design is anything that has to do with visual appeal or functionality. It's the way things get constructed and created.
- **What is journalism?**
 - Journalism has to do with the news. It's the research that goes into a story or an event.
- **What is "design for journalists"?**
 - "Design for journalists," focuses on visually telling a story. It can be in print or online; it's incorporating the design aspect along with a story, rather than creating a story and worrying about the design later.
- **How did you design this page? Why did you design it this way?**
 - I formatted this as a typical college paper and Q&A. for something like this I think keeping it simple is important. Especially in since I am using Microsoft Word and its difficult to design a page using Microsoft Word. I like a clean; sans serif font so I chose Helvetica bold and light for this page. Its perfectly wide and easy to read.
